Biology Faculty makes research presentation in Bali, Indonesia

January 5, 2015

In December 2014, **Dr. Subhrajit Saha** presented a talk on the *Effects of Biochar on Soil Water Retention, pH and Dill (*Anethum graveolens*) Plant Growth* at the International Conference on Agriculture, Biology and Environmental Sciences in Bali, Indonesia organized by the International Academy of Arts, Science & Technology. The study that Dr. Saha presented was part of a project that was funded by the Georgia Southern Internal Seed Funding Program. Dr. Saha was also invited for a guest lecturer at the Ramakrishna Mission Vivekananda University, Kolkata, India, where he holds an adjunct professor position.
